

This is my testimony, Lea Chayes, 7 Maude Cir in Windsor, wish to oppose the decrease in the hunting fees by 20% but rather they should be increased 100%.

As this is primarily a "sport" and funds for human services and education are low (I work for DSS) then surely this is a fair tax. It hasn't been raised in a long time, it affects a very low population, and there are more people who do not hunt than hunt. As it is getting harder to regulate and have staff to keep the public safe I think this is fair to tax them.
